DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Species I in the reply filed on 5 July 2005 is acknowledged.

Claims 4-7, 9, 13, 14, 19-20, 22-24, 28-39, 40-56 and 58-72 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Species II-XIII, there being no allowable generic or linking claim.

Claims 4 and 35-39 read on Species VII, which shows the flow restrictors recessed in a wall of the passage.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Hall et al., U.S. 5,295,397.

Regarding claim 1, Hall et al. discloses a flow passage (at 22 and 24), a flow region (at 23 and 25) in communication with the flow passage; a tool (27) operative in conjunction with fluid in the flow region; and multiple flow restrictors (col. 3, lines 55-68)

Application/Control Number: 10/658,899 Page 3

Art Unit: 3672

in the flow passage, the flow restrictors influencing fluid flow from the passage to the region.

Claim 1-3 and 8 are rejected under 35 U.S.C. 102(a) as being anticipated by Wilson, U.S. 2,960,109.

Regarding claims 1-3, Wilson discloses a flow passage (within 51), a flow region (within 52), a tool (57) operative in conjunction with fluid in the flow region; and multiple flow restrictors or annular shaped projections (60,54) in the flow passage, the flow restrictors being operative to influence flow from the passage to the region.

As to claim 8, Wilson discloses the flow restrictors (60,54) form alternating fluid expansion (within 53) and contraction (at 55 and 59) regions.

Claim 1, 10, 11 and 21 are rejected under 35 U.S.C. 102(a) as being anticipated by Tubel et al., U.S. 5,839,508.

Regarding claims 1, 10, 11 and 21, Tubel et al. discloses in figure 12 a flow passage (below 146), a flow region (above 146), an electrical power generator tool (94) operative in conjunction with fluid in the flow region; and multiple spaced apart flow restrictors or annular shaped projections (90) in the flow passage, the flow restrictors being operative to influence flow from the passage to the region.

Allowable Subject Matter

Claims 73-79 are allowed.

Claims 12, 15-18, 25-27 and 57 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not disclose or suggest all the claimed limitations including a second flow passage.

The prior art of record does not disclose or suggest all the claimed limitations including annular rectangular nor wedge shaped rings.

The prior art of record does not disclose or suggest all the claimed limitations including the flow restrictors having an opening.

The prior art of record does not disclose or suggest all the claimed limitations including a lateral flow region and multiple restrictors.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth Thompson whose telephone number is 571 272-7037. The examiner can normally be reached on 7:00 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David J. Bagnell can be reached on 571-272-6999. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
